Datto SaaS Protection for Microsoft 365

Microsoft Exchange Online (Plan 1) is a hosted email service that allows businesses to work smarter and more efficiently. The product helps businesses maintain control over their environment because they have the advantage of hosting email on Microsoft servers.

Businesses can manage their employees and their clients efficiently with the Exchange admin center – an easy-to-use, web-based interface. Exchange Online enables businesses to run In-Place eDiscovery across Exchange, SharePoint, and Skype for Business data from a single interface through the eDiscovery Center. Using the Tooltip Icon with mobile device policies, administrators can create approved mobile device lists, enforce PIN lock, and remove confidential company data from lost phones.

Users can connect supported versions of Outlook to Exchange Online so there's no need to disrupt workflow. They can also compare calendars to schedule meetings and access collaboration features, including shared calendars, groups, the global address list, external contacts, tasks, conference rooms, and delegation capabilities.

*Office applications and Services, such as Sharepoint, OneDrive, Exchange, Teams, are not included with Microsoft Exchange Online (Plan 1)
